

PUBLIC WORSHIP

Love Thy Neighbor 2026

Production Proposal — Vendor Response Form

Public Worship is seeking a production partner for Love Thy Neighbor 2026, a free outdoor worship block party at the Bandshell in Central Park, for an expected 500 people. Three guest worship leaders play with a full band from the Bandshell’s stage; there is a prayer station, a welcome area, food, and spoken segments that have to reach the back of the crowd. The program runs 3:00–6:00 PM, and everything must be fully set up by 1:00 PM.

This form is the response to the production rider. Sections 1–3 confirm you can meet the minimum specification. Sections 4–9 are yours — we do not tell you what gear to bring or how to patch it. Tell us what you would deploy and how you would get it to the Bandshell with no vehicle access. Video and lighting are not required — but if you do them, we welcome a separately priced proposal for either or both.

Type into this PDF or print and complete by hand, then send it to events@publicworship.life. Attach additional pages wherever the space runs out — we would rather have a fifth page of logistics detail than a tidy blank.

SECTION 2

Minimum specification

Every line below is a floor, not a wish. A proposal that misses one is not a cheaper proposal — it is a different event. If you are taking an exception, say so here rather than leaving us to find it at sound check.

#	MINIMUM REQUIREMENT	MEETS?	HOW YOU MEET IT — OR WHAT YOU PROPOSE INSTEAD
M1	Full band backline — drums, keys, guitar amp, bass amp Complete kit with hardware, throne and rug; 88-key stage piano with stand, pedal and PSU; guitar amp; bass amp. Shared across all three worship sets.		
M2	MD-to-band in-ear monitor system Personal in-ear mixing for the band with a dedicated Musical Director talkback channel into the band's ears.		
M3	Wedge monitors for vocalists Floor monitors covering all downstage vocal positions, on their own mixes.		
M4	A sound system that covers the park Full-range music and intelligible speech across the whole permitted footprint, for 500 people in front of the Bandshell.		
M5	Power distribution that can run all equipment There is no shore power. Generator(s), distro, fuel for the full day and a plan for what happens if one fails.		
M6	Skilled mixing engineer operator(s) — resume/portfolio linked Named, with a live link to a resume, reel or portfolio. Not 'an engineer will be assigned'.		
M7	Stagehands — resume/portfolio linked Named crew responsible for moving and setting up ALL production equipment, on site and off.		
M8	Truck, dollies and a carry crew There is usually no permit to bring a vehicle into the park. Everything is dollied in from the nearest legal vehicle stop and back out again.		

#	MINIMUM REQUIREMENT	MEETS?	HOW YOU MEET IT — OR WHAT YOU PROPOSE INSTEAD
M9	Set up by 1:00 PM; strike immediately at 6:00 PM The event runs 3:00–6:00 PM. Setup must be COMPLETE – built, patched, line-checked – by 1:00 PM, two hours before start. Plan your call time so you are wheeling in by 11:00 AM at the latest. Strike begins the moment the event ends.		

SECTION 3

Schedule acknowledgement

The program runs 3:00 to 6:00 PM. The hard requirement: setup complete — built, patched, line-checked — by 1:00 PM, two hours before start. That means wheeling in from the vehicle stop should begin by 11:00 AM at the latest; your call time is your call, and earlier is smart. Strike begins immediately at 6:00 PM — the park permit does not allow a slow pack-out.

MILESTONE	TIME	YOUR COMMITTED TIME	NOTES
Load-in begins — wheeling in from the vehicle stop	11:00 AM latest		
Generators sited and running	—		
Setup COMPLETE — built, patched, line-checked	1:00 PM sharp		
Sound check with the worship leaders	1:00–2:30 PM		
Program	3:00–6:00 PM		
Strike begins	6:00 PM — immediately		
Site clear, truck loaded	—		

If the 11:00 AM–1:00 PM build window is not enough for your system, tell us the call time you actually need — we would rather move load-in earlier than discover the problem on the day.

IS THE BUILD WINDOW WORKABLE? WHAT CALL TIME DO YOU NEED?

SECTION 4

Gear list

Everything you would bring. Add pages as needed.

SECTION 6

Stage plot & site diagram

Top-down, audience at the bottom. The Bandshell has a real stage — you are not building one. Show PA position, backline, vocal positions, monitors, FOH position, generator siting and the cable runs between them. Attach your own drawing if you have one — this box is here so you are not forced to.

Attach or sketch your stage plot here

NOTES ON THE PLOT

SECTION 7

Logistics plan

There is usually no permit to bring a vehicle into the park. Assume everything is dollied in from the nearest legal vehicle stop and dollied back out. Tell us how you would do it: truck, dollies, carry crew, route, sequence, timings, and how you strike at the end.

TRUCK / VEHICLE	DOLLIES & HAND TRUCKS	CARRY CREW SIZE
ESTIMATED LOAD-IN DURATION	ESTIMATED STRIKE DURATION	SITE CLEAR BY

SECTION 8

Crew

Name everyone who will be on site. A resume, reel or portfolio link is required for every engineer and every stagehand — "an engineer will be assigned" is not an answer we can evaluate. If anyone is subcontracted, say so; we are not against it, we just want to know who is standing behind the console before the day.

NAME	ROLE	EXPERIENCE	RESUME / PORTFOLIO LINK

ANY SUBCONTRACTED CREW? WHO, AND FOR WHAT?

SECTION 9

Power plan

There is no shore power at this site. Be specific — this is the part of the package most likely to go wrong and least likely to be spelled out in a quote.

SECTION 10

Pricing

Itemised, please. Our target for the required scope is \$3,500 all-in including transport, fuel, crew and taxes — stated openly so you can quote scope rather than guess at a number. Price optional items separately so we can take them or leave them. Video and lighting are not required — if you offer either, add them here as their own priced options.

LINE ITEM	BASIS	PRICE

TOTAL, ALL-IN (INCL. TRANSPORT, FUEL, TAX)

OVERTIME THRESHOLD & RATE

QUOTE VALID UNTIL

SECTION 11

Insurance, references & sponsorship

Insurance

■ We can provide a Certificate of Insurance naming Public Worship and the City Parks Department as additional insured, before load-in.

GENERAL LIABILITY LIMIT

WORKERS' COMP

References — two comparable outdoor, generator-powered events.

EVENT & YEAR	CLIENT	CONTACT

Sponsorship — one company handles ALL of production. Either you provide the entire package in kind and are recognised as the event's Production Sponsor, or this is a cash bid — we do not split production across sponsors.

■ **Cash bid**

■ **Full production sponsorship — the whole package, in kind**

SECTION 12

Signature

By signing, you confirm that the exceptions in Section 2 are complete — that there is nothing else in the minimum specification you cannot meet.
